PERSONAL PROJECTS

Kisan Mart - A Full-Stack Agricultural E-Commerce Platform  Live Demo

- Developed a full-stack agricultural e-commerce platform using React, TypeScript, Node.js, Express.js, Firebase Realtime Database, and Tailwind CSS, enabling users to browse, purchase, and track agricultural products.
- Implemented key features including user registration and login, JWT-based authentication, product catalog, shopping cart, secure checkout, order tracking, and Cashfree Payment Gateway integration for online payments.
- Designed and developed RESTful APIs to enable secure communication between the frontend and backend, ensuring efficient data management and seamless application functionality.
- Built a comprehensive admin dashboard to manage products, process customer orders, monitor sales, and update inventory. Deployed the application on Vercel using a serverless architecture.

INTERNSHIP EXPERIENCE

AI & ML Virtual Internship, AICTE-EduSkills Oct – Dec 2025

- Applied data preprocessing, feature engineering, model training, and evaluation techniques to develop machine learning models using Python.
- Utilized supervised and unsupervised machine learning algorithms to analyze datasets and build predictive models.
- Optimized machine learning models through performance evaluation while adhering to ethical AI principles.
